

Mini Project using HTML, CSS, Bootstrap and JavaScript

Simple Shopping Cart

Develop a Website which displays 3 categories of products as shown in the pictures below:

- 1) CDs
- 2) Books
- 3) Flowers

CDs list Page:

Flowers list Page:

Flowers

[Books](#) | [CDs](#)

- ☐ Rose - rosa.
- ☐ Lily - lilium.
- ☐ Tulip - tulipa.

View Cart

Books list Page:

Books

[CDs](#) | [Flowers](#)

- ☒ To Kill a Mockingbird.
- ☐ Harry Potter and the Philosopher's Stone
- ☒ The Lord of the Rings

Add To Cart

View Cart

User should be able to select items using checkboxes and click **Add To Cart** button.

Any time user clicks “**View Cart**” button, it should display all the items in the Cart as below:

Items Selected in my Cart

- To Kill a Mockingbird.
- The Lord of the Rings

Note: Once you are in a particular category page, there should be two hyperlinks to Go to the remaining other two categories. For e.g. if you are in CDs page, it should display CDs items for selection and also two hyperlinks for **“Books”** and **“Flowers”**.
