

## Mini Project using HTML, CSS, Bootstrap and JavaScript

Design a Website **Online Mobile Store** used for browsing Mobiles and buy.

1. Design a Home page as below:

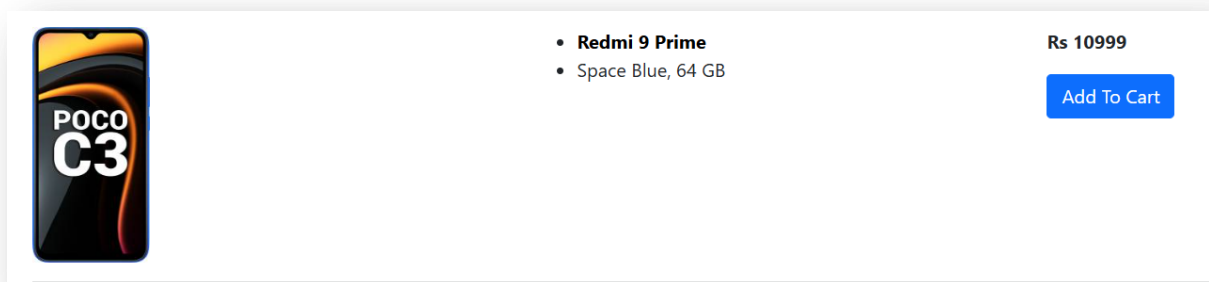

2. Put a hyperlink **"Shop mobiles"** somewhere in the home page which when user clicks should display the list of mobile as below:

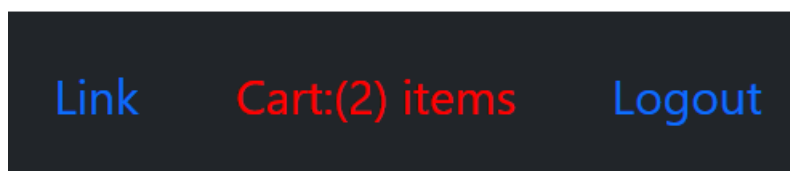

3. Store some sample list of mobiles to display in web storage when Home page is loaded with following fields:
  - **id**
  - **Model name**
  - **Descriptions**
  - **price**
  - **quantity available**
  - **picture file name of the mobile**

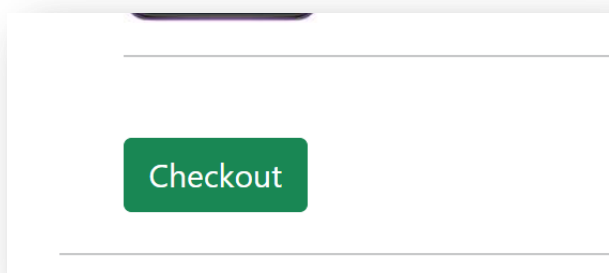

Sample one mobile record is shown below:

4. There should be one button **“Add To Cart”** as shown in the picture. User when clicks should get added to the Cart object which is displayed top right in the page shown as below:

5. After the mobiles list, at the bottom there should be a **“Checkout”** button. User can do checkout any time.

6. When Checkout button is clicked, it should take you to the checkout page and display items in the Cart as below:

Flipkart

### Items in your Cart

Sno	Picture	Name	Quantity	Price	Total Cost	
1		Redmi 9 Prime	1	10999	10999	<a href="#">Edit</a>   <a href="#">Details</a>   <a href="#">X</a>
2		POCO C3	1	8499	8499	<a href="#">Edit</a>   <a href="#">Details</a>   <a href="#">X</a>

Total Amount: Rs 19498

Place Order

Continue Shopping

It displays items details along with quantity selected and total cost i.e. **quantity \* price**.

Below it should display the total cost of all the items.

7. “Edit” hyperlink should go to next page and displays the editing for quantity as below:

## Edit Product Item

**Name :** Redmi 9 Prime

**Description :**

**Price :** 10999

**Quantity :**

Update

Back

Continue Shopping

8. User can edit the quantity and on click of “Update” it should update the quantity of the item. “Back” button from here should take the user back to the Items in the cart page and show the modified quantity as below:

## Items in your Cart

Sno	Picture	Name	Quantity	Price	Total Cost	
1		Redmi 9 Prime	2	10999	21998	<a href="#">Edit</a>   <a href="#">Details</a>   <a href="#">X</a>
2		POCO C3	1	8499	8499	<a href="#">Edit</a>   <a href="#">Details</a>   <a href="#">X</a>

Total Amount: Rs 30497

Place Order

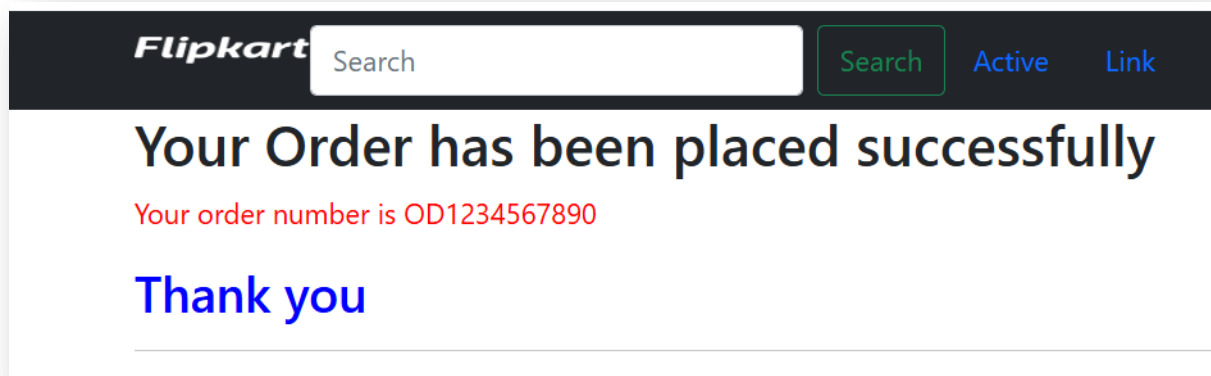

Continue Shopping

9. “Details” hyperlink should only display the Details of the item as below:

From here also user can Add the item to the Cart.

10. "X" option should simply remove the item and also from the Cart.
11. "Place Order" button should finish the order with the following message:

12. "Continue Shopping" should resume shopping.
13. User can also click to the "Cart" option in the page header to display items in the cart and if there are not items in the Cart it should display proper message as below:

**Flipkart**
